

Guides Training: Musculoskeletal System and Pain

Features interactive, easy-to-use, this is the Guides Fifth training software designed for use on your PC or MAC. This CD-ROM serves as an interactive method of study providing a self-paced learning experience for the musculoskeletal and pain sections of the AMA Guides Fifth. Designed to provide a basic overview along with detailed instruction on how to correctly use and execute Chapters 15-18. It is excellent for those new to evaluating impairment and also effective as a refresher resource. Training is done at your pace, with helpful toolbars, a glossary, find feature, and interactive review questions at the end of each chapter. After completing the training the user will be able to: explain the content and structure of the Guides Fifth Edition; demonstrate the ability to perform the process for rating impairment of the spine, upper extremities, lower extremities, and pain; and, discuss the essential elements of a quality impairment evaluation. This flexible training CD-ROM is beneficial to those who are unable to attend seminars, or prefer to learn in the comfort of their home or office. Users can feel confident that they are receiving top-notch training directly from the AMA.
