

Lifestyle of Success

When the world economy crumbled in 2008 and fiscal hardships became more apparent throughout the nation, the financially educated began to stand out. Seemingly un-phased by the crippled economy, the fiscally responsible varied from high stake investors to checkers at a super market, and though their social status differed, their financial lifestyle was very much the same. After several interviews, multiple trials and countless errors, the adopted lifestyle of the financially educated is clearly outlined in this book so that you too can apply these proven habits in your life, and take control of your financial future today.
